DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by
Kawakita et al. US 5,336,547.

Kawakita et al. discloses a transfer substrate (61) for electrode (65) transfer onto a semiconductor device (71), including a transfer substrate, a seed film (62) on the transfer substrate, and a patterning film (63) on the transfer substrate, the patterning film partly covering a surface of the seed film so as to expose a metal electrode receiving portion (64) of the seed film, a metal electrode portion (65) provided on the seed film, wherein the metal electrode releases from the seed film when transferred to the semiconductor device (71). On the semiconductor device the metal electrode portion is a bump protruding from the a surface of the semiconductor device and having a planar top surface and a recess extending over an entire peripheral edge of the planar top surface (see figs. 6-7c and related text).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
